Reservoir Simulation Course, AES1350

Dear our 1st year MSc students,

Starting 20th of April we will have Reservoir Simulation Course, AES1350. It consists of 6 days of lectures+practicals about basics, but very important and practical, aspects of reservoir simulation. Although I will do my best to keep the content understandable for most of you, the course is well suited for those who have successfully passed rock fluid physics courses, having also some basic knowledge of computational methods and MATLAB (or any other) programming.

Note that our lecture days are: 20, 21, 23, 30 April along with 7 and 12 May. And as far as I am informed, there should be no conflict with your upcoming field trips, etc.

Regards,
Hadi Hajibeygi, Assistant Prof.

Minor Event 23 April 2015

Today’s job market is calling for engineers with wide-ranging knowledge who are willing to look beyond the boundaries of their own degree discipline. In order to prepare its students for the working world, TU Delft has a major/minor structure in all of its Bachelor’s programmes. In addition to providing a focus on your major or main degree subject, this system enables you to add another dimension to your studies in the form of a minor.

The minor is a cohesive unit of courses worth a total of 30 ECTS credits, accounting for six months of your studies. You take your minor in the first semester of your third Bachelor’s year. You are entirely free in your choice of minor. It therefore provides an appealing opportunity to look beyond the bounds of your own discipline.
WANTED: Coaches for the Introduction Programme 2015

The Introduction Programme is a 2-week compulsory programme (17-27 August) for all international students who are about to begin their studies at the TU Delft. Since its initiation in 2008 it has enjoyed a growing success and welcomed a record number of 1200 students in summer 2014. The Introduction Programme consists of mandatory and voluntary programme elements that are all designed to get students acquainted with the academic culture of TU Delft, the city of Delft and The Netherlands in general. At the same time they meet their new peers from around the world. The Introduction Programme contains all the necessary ingredients to ensure that new international students enjoy a great start of their studies in Delft. Please watch this video in order to get a better idea of the Introduction Programme.

Study Abroad – Vienna Summer School for Assistive Technology

The Assistive Technology Summer School offers international students a balanced and extensive project week to acquire and deepen practical knowledge in various topics of modern Assistive Technology. It is organised by the AsTeRICS Academy project of the University of Applied Sciences Technikum Wien and funded by the City of Vienna. International acknowledged experts in the field of inclusive design and assistive technology will held lectures and hands-on tutorials. The thematic focuses are embedded in cultural activities and events of a varied accompanying program.

More information can be read on the website.

Data joint Board of Examiners CE and AES

13 April 2015, 11 May 2015 and 8 June 2015

Meetings will take place at Mondays, 15.00 hrs. in room 2.72

Letters for the Board of Examiners have to be provided with study number, name, address and signature and shall be handed in 12 days prior to the meeting.
